Exp 6.py

```python
words = input("Enter sentence: ").split()
start = input("Enter starting word: ")

if start in words:
    i = len(words) - 1 - words[::-1].index(start)   # Last occurrence
    print("Generated Text:")
    print(" ".join(words[i:]))
else:
    print("Starting word not found.")

```

Run main

```
/Users/moshika/PyCharmMiscProject/.venv/bin/python /Users/moshika/PyCharmMiscProject/Exp 6.py
Enter sentence: I love python because python is easy to learn
Enter starting word: python
Generated Text:
python is easy to learn

Process finished with exit code 0
```
